*To Whom It May Concern:*

*The deteriorating condition of the front of our building was of concern so we engaged an architect to come up with a concept design & then proceeded to full scale drawings. Quotes were called from three of Hamilton's leading construction companies & after consulting our architect we chose Lobell Construction. We are a very busy hydraulic sales & service company & it was imperative that the makeover in no way hindered day to day business. We requested a daily schedule indicating the builder's progress & the interiors of the four front offices were completed ahead of time & the final sign off of the job was on the due date despite inclement weather conditions which prevailed over the 9 week period. Site meetings were held at regular intervals & these were attended by Lou Shaw, the architect & ourselves. From start to finish this job has gone very smoothly & staff & management from Lobell Construction have been very professional & courteous at all times. We are fastidious about how we present our company to clients & Lobell Construction have transformed our dated tired building & given it a slick new image - we are delighted & would highly recommend them to anybody who wants to deal with "simply the best"*
